

Table of Contents

A Survey of Modeling and Fault Detection and Diagnosis in Building Energy Management Systems.....	1
<i>Krishnan Srinivasarengan, Christophe Aubrun, Didier Maquin</i>	
Integrated Product Development of Control and Diagnosis Functionalities	15
<i>Ralf Stetter</i>	
Neural Network-based Nonlinear Model Predictive Control of Pneumatic Servomechanism	28
<i>Krzysztof Patan</i>	
Stability and Stabilisation of Active Ladder Circuits Modeled in the Form of Two-dimensional (2D) Systems	42
<i>Bartłomiej Sulikowski</i>	
Construction and Effectiveness Analysis of Selected Control Methods for an Unmanned Helicopter Simulator	55
<i>Daniel Zegar</i>	
Wind Turbine Sensor Fault Diagnosis with Robust Observers	69
<i>Joanna Ochałek</i>	
Model Predictive Control for Flotation Two Tank System	84
<i>Konrad Mazur</i>	
Fault Tolerant Control: Processor in the loop Testing	98
<i>Mariusz Buciakowski</i>	
Robust Control for Multi-tank Systems	111
<i>Michał de Rozprza-Faygel</i>	
Robust Fault Detection for Non-linear Two-tank System	129
<i>Marcel Łużar</i>	
Robust Predictive Control for Nonlinear Magnetic Suspension System	140
<i>Zbigniew Kański</i>	
Towards Model Predictive Control with Max-plus Algebra for a Battery Assembly System	154
<i>Lothar Seybold, Paweł Majdzik</i>	
A Neural-network-based Robust Observer for Unknown Input Decoupling and Fault Estimation	182
<i>Piotr Witczak</i>	
Author Index	196
