

Contents

SECTION 1: General Microbiology

1. Microbiology and Nurses	3
• Infection control team	3
• Role of nurses in prevention of hospital acquired infection	3
2. History and Scope	5
• Microbiology	7
• Biological weapons	7
3. Morphology of Bacteria	10
• Slime layer	11
• Capsule	12
• Cell wall	12
• Cytoplasmic membrane	14
• Cytoplasm	15
• Nucleus	16
• Flagella	16
• Fimbriae	17
• Spores	18
• Unstained preparations	21
• Staining of bacteria	21
• Biofilm	23
4. Nutritional Requirements of Bacteria	24
• Growth requirements	24
• Growth curve	25
• Bacterial reproduction	27
• Generation time	27
5. Media for Bacterial Growth	28
• Fluid media	28
• Solid media	29
• Methods of isolating pure culture	31
• Methods of anaerobic culture	32
6. Classification and Identification of Bacteria	35
• Biological classification	35
• Morphological classification	35
• Identification of bacteria	36
7. Sterilization and Disinfection	40
• Application of disinfectants	40
• Autoclave	42
8. Infection	47
• Classification of infection	47
9. Chemotherapeutic Agents	50

SECTION 2: Bacterial Genetics

10. Bacterial Genetics	55
• Structure of DNA	55
• Plasmid	56
• Transmission of genetic material	56

SECTION 3: Immunology

11. Immunity	61
• Historical events in immunology	61
• Application of immunology	62
• Immunity	62
• Innate immunity	62
• Acquired immunity	65
• Vaccination	66
• Newer vaccines	67
• Application of vaccine	68
12. Antigen	69
• Properties of antigen	69
• Superantigen	71
13. Antibodies—Immunoglobulins	72
• Immunoglobulins	72
14. Antigen and Antibody Reactions	77
• Precipitation	77
• Lattice hypothesis	77
• Agglutination reactions	79
• Technique of agglutination test	79
15. The Complement System	83
16. Hypersensitivity	87
• History	87
• Hypersensitivity	87
• Type I reactions	88
• Type II reactions	92
• Type III reactions	92
• Delayed hypersensitivity (type IV reaction)	93
• Classical type	93
• Granulomatous reactions	94
• Schwartzman reaction	94
17. Immunohematology	95
18. Miscellaneous	98
• Immune deficiency syndrome	98

- Acquired immune deficiency syndrome (AIDS) 99
- Autoimmune diseases 99
- Immunology of transplantation 100
- Immunological surveillance 102
- Immunological tolerance 102
- Limulus amebocyte lysate test (LAL test) 103
- Radioimmunoassay method 103
- Enzyme-linked immunosorbent assay (ELISA) 103
- Monoclonal antibodies 104
- Nobel prize in medicine in 1987 105

SECTION 4: Systemic Bacteriology

19. Staphylococcus 109

- Micrococcaceae 109
- Staphylococcus aureus (Staphylococcus pyogenes) 109
- Biotypes 112
- Toxins 113
- Methicillin-resistant Staphylococcus aureus 115
- Staphylococcus saprophyticus 115
- Staphylococcus albus 115
- Staphylococcus citreus 116
- Micrococcus tetragen (Gaffkya tetragen) 116
- Sarcina 116

20. Streptococcus 117

- Group A 118
- Group B 122
- Diseases caused by group 'B' Streptococci 122
- Group C 123
- Group D 123
- Alpha hemolytic streptococci 123
- Anaerobic streptococcus 124
- Anaerobic cocci 124

21. Pneumococcus 125

22. Neisseria 129

- Neisseria meningitidis 129
- Neisseria gonorrhoeae 131

23. Corynebacterium 134

- Corynebacterium diphtheriae 134
- Diphtheroids 138

24. Mycobacteria 139

- Mycobacterium tuberculosis 139
- BCG vaccine 146
- Atypical mycobacteria 146
- Skin pathogens 147
- Mycobacterium leprae 148

25. Bacillus 152

- Bacillus anthrax 152
- Bacillus subtilis 154
- Bacillus cereus 155

26. Clostridium 156

- Clostridium tetani 156
- Clostridium perfringens (Clostridium welchii) 159
- Nagler's reaction 160
- Clostridium botulinum 161
- Clostridium difficile 163

27. Enterobacteriaceae 164

- Escherichia coli 164
- Edwardsiella 167
- Citrobacter 167
- Klebsiella 167
- Enterobacter 168
- Hafnia 168
- Serratia 168
- Proteus 168
- Shigella 169
- Toxin 170
- Salmonella 171

28. Pseudomonas 178

- Pseudomonas aeruginosa (Pseudomonas pyocyanea) 178
- Toxins and enzymes produced by pseudomonas 179

29. Vibrio 180

- Vibrio cholerae 180

30. Brucella 184

- Gram-negative coccobacilli 184

31. Hemophilus 187

32. Spirochaetes 190

- Borrelia 190
- Lyme disease 191
- Leptospira 191
- Treponema 193

SECTION 5: Virology

33. General Characteristics of Viruses 199

- Inclusion bodies 205

34. Classification of Viruses 207

35. DNA Viruses 211

- Poxvirus 211
- Smallpox (variola major) 212
- Molluscum contagiosum 214
- Adenoviruses 214
- Herpes virus 215

36. RNA Viruses 218

- Picornaviruses A 218

• Orthomyxoviruses	219
• Influenza viruses	219
• Paramyxoviruses	220
• Rhabdovirus	222
37. Severe Acute Respiratory Syndrome	225
• Clinical picture	226
• Laboratory diagnosis	226
• Management	226
38. Avian Influenza (Bird Flu)	227
• Spread of infection	227
• Symptoms	227
• Prevention and treatment	227
39. Acquired Immune Deficiency Syndrome	228
• Important events in AIDS	228

SECTION 6: Mycology

40. Mycology	237
• Morphological classification of fungi	237
• Systematic classification	237
• Microsporium	240
• Epidermophyton	243
• Subcutaneous mycosis	244
• Systematic mycosis	246
• Opportunistic mycotic infections	250
• Miscellaneous mycology topics	252

SECTION 7: Parasitology and Medical Entomology

41. Protozoa	257
• Rhizopoda	257
• Serological tests in invasive amebiasis	260
• Free living soil ameba	261
• Mastigophora	262
• Trichomonas vaginalis	264
• Trichomonas tenax	265
• Trichomonas hominis	265
• Trypanosoma brucei	265
• Trypanosoma cruzi	266
• Leishmania donovani	267
• Pathology and clinical picture	269
• Post kala-azar dermal leishmaniasis (dermal leishmaniasis)	271
• Leishmania tropica	271
• Leishmania braziliensis	271
• Sporozoa	272
• Toxoplasma gondii	277
• Isospora belli	279
• Cryptosporidium parvum	280
• Babesia	281
• Parasites associated with AIDS	281
• Ciliata balantidium coli	282

42. Helminths	283
• Nematodes	283
• Trematodes	297

43. Medical Entomology	300
-------------------------------	------------

SECTION 8: Clinical Microbiology

44. The Normal Flora	309
• Location of normal flora	309
45. Collection and Transport of Clinical Specimens	311
46. Collection and Preliminary Processing of Specimens	313
47. Diagnostic Microbiology—An Approach to Laboratory Diagnosis	315
• Pyrexia of unknown origin (PUO)	316
• Sore throat	317
• Urinary tract infection	318
• Meningitis	319
• Infective diarrhea	320
• Wound infection	321
• Food poisoning	322
• Pulmonary tuberculosis	323
• Infective endocarditis	325
• Septicemia/bacteremia	325
48. Serological and Skin Tests	327
49. Microbiology in the Service of Human Being	330
• Medical microbiology	330
• Role of microbiology	330
• Importance in diagnosis of infectious disease	331
50. Community Microbiology	332
• Role of microbiology in community	332
51. Hospital Infections	334
52. Handwashing	337
• Factors influencing handwashing	337
• Steps to wash hands	337
• When to wash hands	338
• How to wash hands	338
53. Hospital and Laboratory Wastes	339
• Infectious waste of hospital and laboratory	339
• Infectious microorganisms associated with hospital or laboratory	339
• Techniques for waste treatment	340
• Disposal of hospital and laboratory waste	341
54. Infection Control Measures for Nursing Staff	342
• Infection control checklist for nursing staff	342

- Are you preventing sharps injuries? 343
- Do you deal promptly with spillages? 343
- Do you use personal protect equipment and know standard precautions 344
- Do you scrupulously decontaminate equipment? 345
- Do you know what to do in the event of an accident? 345
- Appropriate use of indwelling devices 346
- Have you washed your hands? 347
- Facilities 348

- Handwashing agents 348
- Hand drying agents 349

55. Emergency Microbiology 351

- Visualization of the agent of disease 351
- Antigen detection 351

56. Bacteriology of Milk, Air and Water 353

- Bacteriology of milk 353
- Bacteriology of water 357

Glossary 363
