## Chapter 1 : Introduction to Autodesk CFD

<b>Introduction of Fluid Mechanics</b>	<b>1-2</b>
<b>Basic Properties of Fluids</b>	<b>1-2</b>
Mass Density, Weight Density, and Specific Gravity	1-2
Viscosity	1-2
<b>Problem on Viscosity</b>	<b>1-3</b>
<b>Types of Fluids</b>	<b>1-4</b>
<b>Thermodynamic Properties of Fluid</b>	<b>1-4</b>
Universal Gas Constant	1-5
Compressibility of Gases	1-5
Vapour Pressure and Cavitation	1-5
<b>Pascal's Law</b>	<b>1-5</b>
<b>Fluid Dynamics</b>	<b>1-5</b>
Bernoulli's Incompressible Fluid Equation	1-5
Eulerian and Lagrangian Method of Analysis	1-6
<b>Differential Approach of Fluid Flow Analysis</b>	<b>1-7</b>
Acceleration	1-7
<b>Introduction to CFD</b>	<b>1-7</b>
<b>Conservation of Mass</b>	<b>1-12</b>
<b>Conservation of Momentum</b>	<b>1-12</b>
<b>Conservation of Energy</b>	<b>1-14</b>
<b>Variations of Navier-Stokes Equation</b>	<b>1-15</b>
Time Domain	1-15
Compressibility	1-16
Low and High Reynolds Numbers	1-16
Turbulence	1-17
<b>Steps of Computational Fluid Dynamics</b>	<b>1-19</b>
Creating Mathematical Model	1-19
Discretization of Model	1-20
Analyzing with Numerical Schemes	1-20
Solution	1-20
Visualization (Post-processing)	1-20
<b>Finite Difference Method</b>	<b>1-20</b>
<b>Introduction to Autodesk CFD</b>	<b>1-23</b>
Use of Autodesk CFD	1-23
Applications of Autodesk CFD	1-23
How does CFD works	1-25
Advantages of Autodesk CFD	1-25
<b>Downloading and Installing Autodesk CFD Student Version</b>	<b>1-26</b>
<b>Starting Autodesk CFD</b>	<b>1-27</b>
Start & Learn tab	1-28
<b>Self-Assessment</b>	<b>1-36</b>
