Foreword

Preface

PART I UNDERSTANDING TOURISM INFORMATION TECHNOLOGY

1. Introduction to Tourism and Information Technology

Learning Objectives

Introduction

Tourism: an Information-intensive Industry

Characteristics of tourism

Applications of information technologies in tourism

Typologies of information

The Evolution of Information Technologies

Computers

Networking and the Internet

Ubiquitous technologies

Implications for travel and tourism

Strategic Thinking and Information Technology

Chapter Outline

Summary

Key Terms

Discussion Questions	17
Useful Websites	18
References	20
2. The Digital Tourism Landscape	22
Learning Objectives	22
Introduction	22
The Digital Tourism Ecosystem	23
Digital technological environment	23
Digital entities and communities	25
Digital ecosystem functions	26
Innovation and Change in the Digital Landscape	28
Innovation and technological change	28
Technology adoption	31
Strategic responses to technological innovation	33
Understanding the Digital Tourist	34
Factors influencing technology use and acceptance	34
Technology use in the travel process	37
Methods for understanding the digital tourist	39
Summary	40
Key Terms	41
Discussion Questions	41
Useful Websites	42
References	44

PART II LOOKING AND BOOKING

3. Travel Intermediaries and Information Technology	47
Learning Objectives	47
Introduction	47
Travel Distribution Systems	48
The traditional travel distribution system	48
The digital travel distribution system	50
Global Distribution Systems	52
Evolution of reservation systems	53
Global distribution system functions	56
Information technology infrastructure	57
Connections and interfaces	59
The future of global distribution systems	59
Tour Operators	65

Traditional Travel Retailers	66
Front-office systems	66
Back-office systems	67
The future of traditional travel retailers	68
Travel Management Companies	72
Online Intermediaries	72
Types of online intermediaries	73
Information technology innovations	74
The future of online intermediaries	75
Channel and Reputation Managers	77
Summary	78
Key Terms	79
Discussion Questions	79
Useful Websites	80
References	83
4. The Internet and the Tourist	85
Learning Objectives	85
Introduction	85
History and Evolution of the Internet	86
Intranets and Extranets	89
The World Wide Web	90
Domains, Protocols and Languages	91
Domains	91
Protocols	91
Online programming languages	92
Internet Applications in Travel	92
Functionality of travel websites	92
A typology of travel websites	94
Online Information Search	96
Online information search behavior	96
Search engines	97
Intelligent assistants and online recommender systems	101
Digital Marketing Communications	101
Designing and Maintaining Tourism Websites	103
Planning	103
Design	105
Delivery	106
Management	107
Evaluation	109

Summary	110
Key Terms	110
Discussion Questions	110
Useful Websites	111
References	113
5. Social Media and Tourism	116
Learning Objectives	116
Introduction	116
Understanding Social Media	116
The social media landscape	117
Social media functions	119
Electronic word of mouth	121
Social Media Platforms in Travel	125
Social network sites	125
Wikis, blogs and product reviews	128
Forums	131
Media sharing	131
Crowdsourcing	132
Virtual worlds	133
Travel podcasts	133
Strategic Applications of Social Media	133
Marketing and sales	135
Market intelligence	136
Customer service	136
Reputation management	138
Recruitment and partnerships	138
Summary	138
Key Terms	139
Discussion Questions	139
Useful Websites	140
References	143
PART III TRAVELING	
6. Mobilities and Information Technology	145
Learning Objectives	145
Introduction	145
The Mobile Technologies Ecosystem	147
Mobile Devices	148

Global positioning system navigation devices	148
Digital cameras	149
Smartphones and tablets	150
Wearable devices	150
Mobile Signals and Sensors	151
Sensing technologies	151
Signaling technologies	152
Mobile Operating Systems and Apps	154
Functions of Mobile Devices in Tourism	155
Informing	155
Contextualizing	159
Personalizing	161
Socializing	162
Managing	165
Translating	166
Purchasing	166
Entertaining	166
Gamifying	167
Reflecting	169
Challenges and Opportunities	169
Summary	169
Key Terms	170
Discussion Questions	170
Useful Websites	171
References	173
7. Aviation and Information Technology	177
Learning Objectives	177
Introduction	177
Airlines	178
Airline use of information technology	178
Airline reservation systems	181
Decision support systems	183
Marketing and customer relationship management	186
Departure systems	188
In-flight technologies	190
Airports	191
Passenger processing	192
Baggage and cargo handling	198
Air traffic control	199
Environmental management systems	199

Summary	200
Key Terms	201
Discussion Questions	201
Useful Websites	202
References	204
8. Surface Transport and Information Technology	206
Learning Objectives	206
Introduction	206
Intelligent Transportation Systems	207
National intelligent transportation systems	208
Components of an intelligent transportation system	208
Vehicle technology	213
Fleet management systems	214
Vehicle Rental Companies and Information Technology	214
Reservation systems	215
Vehicle inventory control	215
Vehicle sharing	215
Taxis and ride sharing	216
Rail Transport and Information Technology	217
Water Transport and Information Technology	218
Integrated Public Transport Systems	221
Summary	222
Key Terms	222
Discussion Questions	223
Useful Websites	223
References	226
PART IV STAYING AND PLAYING	
9. Hospitality Information Systems	227
Learning Objectives	227
Introduction	227
Information Technology Systems in the Accommodations Sector	228
Property management systems	229
Hotel websites and apps	234
Electronic hotel reservations	234
Customer relationship management	237
Guest room amenities	237
Hotel communications	240
Energy management systems	242

Intelligent hotel rooms	243
Interfaces between property management systems and other systems	243
IT Applications in the Foodservice Sector	245
Point-of-sale systems	245
Restaurant management systems	247
Marketing and customer relations	248
Strategic Management of Information Technology in Hospitality	248
Summary	251
Key Terms	252
Discussion Questions	252
Useful Websites	253
References	255
10. Technology-enabled Visitor Experiences	259
Learning Objectives	259
Introduction	259
Attracting Visitors	260
Visitor information	260
Sales and distribution	261
Staging Experiences	261
Technology as an enabler	263
Technology as a creator	265
Technology as an attractor	265
Technology as an enhancer	266
Technology as a protector	266
Technology as an educator	267
Technology as a substitute	270
Technology as a facilitator	271
Technology as a reminder	271
Technology as a destroyer	272
Managing Visitors	272
Admission	272
Orientation	273
Ancillary purchases	273
Crowding and queue management	274
Business intelligence and relationship management	275
Safety and security	277
Casinos and gaming	278
Summary	278
Key Terms	279
Discussion Questions	279

Useful Websites	279
References	282
11. Destination Management and Smart Destinations	285
Learning Objectives	285
Introduction	285
Destinations and the Digital Tourism Ecosystem	286
Destination Management Systems	286
Destination management system dimensions	288
Destination management system organization	291
Destination management system management	292
From Destination Management Systems to Smart Destinations	293
Destination Research	296
Crisis and Risk Management	300
Stakeholder Management and Learning Destinations	302
Summary	305
Key Terms	306
Discussion Questions	306
Useful Websites	306
References	309
 PART V ISSUES AND TRENDS	
12. Sustainable Tourism and Information Technology	312
Learning Objectives	312
Introduction	312
Environmental Sustainability and Information Technology	315
Resource efficiency	316
Environmental purity and physical integrity	318
Biological diversity	321
Virtual substitute travel experiences	323
Socio-cultural Sustainability and Information Technology	324
Social equity and community well-being	324
Local control	327
Cultural richness of host communities	328
Economic Sustainability and Information Technology	331
Economic viability and local prosperity	331
Employment quality and capacity building	334
Summary	335
Key Terms	335
Discussion Questions	336

Useful Websites	336
References	338
13. The Future of Information Technology and Tourism	341
Learning Objectives	341
Introduction	341
The Virtuous Cycle of Technological Development	343
Trends in Tourism Information Technologies	344
Trend 1: Ubiquitous artificial intelligence	345
Trend 2: Fragmentation of information	346
Trend 3: Digital elasticity	347
Trend 4: Storytelling	347
Trend 5: The empowered smart traveler	347
Trend 6: Big data and analytics	348
Trend 7: Smart machines	349
Trend 8: Material technologies	350
Trend 9: Open systems	350
Trend 10: Convergence	351
Summary	351
Key Terms	351
Discussion Questions	352
Useful Websites	352
References	353
Index	355
