Cost Accounting: Information for Decision Making 2

Business Application: *Understanding Costs in a Small Business* 3

Value Creation in Organizations 3

Why Start with Value Creation? 3

Value Chain 4

Supply Chain and Distribution Chain 5

Business Application: *Focus on the Supply Chain* 5

Using Cost Information to Increase Value 5

Accounting and the Value Chain 6

Accounting Systems 6

Financial Accounting 6

Cost Accounting 6

Cost Accounting, GAAP, and IFRS 7

Customers of Cost Accounting 7

Our Framework for Assessing Cost Accounting Systems 8

The Manager's Job Is to Make Decisions 8

Decision Making Requires Information 8

Finding and Eliminating Activities That Don't Add Value 9

Identifying Strategic Opportunities Using Cost Analysis 9

Owners Use Cost Information to Evaluate Managers 10

Cost Data for Managerial Decisions 10

Costs for Decision Making 10

Business Application: *Fast-Food Chain Menu Items and Costs* 11

Costs for Control and Evaluation 11

Different Data for Different Decisions 13

Trends in Cost Accounting throughout the Value Chain 14

Cost Accounting in Research and Development (R&D) 14

Cost Accounting in Design 14

Cost Accounting in Purchasing 15

Cost Accounting in Production 15

Cost Accounting in Marketing 15

Cost Accounting in Distribution 16

Cost Accounting in Customer Service 16

Enterprise Resource Planning 16

Creating Value in the Organization 17

Key Financial Players in the Organization 17

Choices: Ethical Issues for Accountants 18

What Makes Ethics So Important? 18

Ethics 19

The Sarbanes-Oxley Act of 2002 and Ethics 19

Business Application: *Options Backdating at Apple* 20

Cost Accounting and Other Business Disciplines 21

The Debrief 21

4**Fundamentals of Cost Analysis for Decision Making 166**

Business Application: *Cost Analysis and the Choice of Office Space for a Small Business* 117

Differential Analysis 118

- Differential Costs versus Total Costs 118
- Differential Analysis and Pricing Decisions 119
- Short-Run versus Long-Run Pricing Decisions 119
- Short-Run Pricing Decisions: Special Orders 120
- Long-Run Pricing Decisions 122
- Long-Run versus Short-Run Pricing: Is There a Difference? 122
- Cost Analysis for Pricing 123
- Business Application: *Take-Back Laws in Europe* 124

Legal Issues Relating to Costs and Sales Prices 124

- Predatory Pricing 124
- Dumping 125
- Price Discrimination 125
- Peak-Load Pricing 126
- Price Fixing 126

Use of Differential Analysis for Production Decisions 126

- Make-It or Buy-It Decisions 127
- Make-or-Buy Decisions Involving Differential Fixed Costs 127
- Opportunity Costs of Making 130
- Decision to Add or Drop a Product Line or Close a Business Unit 132
- Product Choice Decisions 134

The Theory of Constraints 137

- The Debrief 139

Summary 139

6**Fundamentals of Product and Service Costing 210****Cost Management Systems 211**

- Reasons to Calculate Product or Service Costs 211
- Business Application: *Importance of Distinguishing between Production Costs and Overhead Costs* 212
- Cost Allocation and Product Costing 212
- Cost Flow Diagram 213

Fundamental Themes Underlying the Design of Cost Systems for Managerial Purposes 213

Costing in a Single Product, Continuous Process Industry 214

- Basic Cost Flow Model 214
- Costing with No Work-in-Process Inventories 214
- Costing with Ending Work-in-Process Inventories 215

Costing in a Multiple Product, Discrete Process Industry 216

- Predetermined Overhead Rates 218
- Product Costing of Multiple Products 219
- Choice of the Allocation Base for Predetermined Overhead Rate 219
- Choosing among Possible Allocation Bases 220

Multiple Allocation Bases and Two-Stage Systems 221

- Choice of Allocation Bases 222

Different Companies, Different Production and Costing Systems 223

- Operations Costing: An Illustration 224
- The Debrief 226

Summary 226

Process Costing 284

Determining Equivalent Units 286

Using Product Costing in a Process Industry 287

- Step 1: Measure the Physical Flow of Resources 287
- Step 2: Compute the Equivalent Units of Production 287
- Business Application: *Overstating Equivalent Units to Commit Fraud* 288
- Step 3: Identify the Product Costs for Which to Account 289
- Time Out! We Need to Make an Assumption about Costs and the Work-in-Process Inventory 289
- Step 4: Compute the Costs per Equivalent Unit: Weighted Average 290
- Step 5: Assign Product Cost to Batches of Work: Weighted-Average Process Costing 291

Reporting This Information to Managers: The Production Cost Report 291

Sections 1 and 2: Managing the Physical Flow of Units 293

Sections 3, 4, and 5: Managing Costs 293

Assigning Costs Using First-In, First-Out (FIFO) Process Costing 293

Step 1: Measure the Physical Flow of Resources 294

Step 2: Compute the Equivalent Units of Production 294

Step 3: Identify the Product Costs for Which to Account 296

Step 4: Compute the Costs per Equivalent Unit: FIFO 296

Step 5: Assign Product Cost to Batches of Work: FIFO 297

How This Looks in T-Accounts 297

Determining Which Is Better: FIFO or Weighted Average? 298

Computing Product Costs: Summary of the Steps 298

Using Costs Transferred in from Prior Departments 298

Who Is Responsible for Costs Transferred in from Prior Departments? 300

Choosing between Job and Process Costing 302

Operation Costing 302

Product Costing in Operations 303

Operation Costing Illustration 303

Comparing Job, Process, and Operation Costing 306
